Description:

Ebocom, L.L.C. is a fast-growing boutique technology company that provides full-service back-office transaction processing services. "Fast, focused and flexible" is our motto at eboCom and the eboCom team is the "best of the best"! We are looking for another individual to join our team who possesses an extremely positive "can do" attitude and is eager to help support our growth. The ideal candidate must be a business-minded, customer-focused, technically savvy, detail oriented individual with an entrepreneurial spirit that is capable of functioning with little to no direct guidance.

The ideal candidate must possess strong leadership and visionary skills to function in this extremely focused 7x24x365 environment. This person will help design, build, maintain and troubleshoot a High Availability network infrastructure.

Responsibilities:

- Administers and maintains networking equipment including routers, switches, VPN's, load balancers, firewalls
- Provide technical expertise in researching and resolving complex technology infrastructure challenges which may involve coordination with hardware and software vendor support
 - Isolates and corrects problems with speed and accuracy while escalating when additional resources are needed or management participation is required
- Maintain and improve environment through existing LAN/WAN strategies. Participate in evaluation and selection of hardware and software products, and integration of products into technical solutions
- Author technical documentation such as network and data center diagrams
- Ensure security and operational standards and procedures are maintained in accordance with compliance requirements, standards, and industry best practices
- Maximizes network performance by monitoring performance; troubleshooting network problems and outages; scheduling upgrades
- Performs complex upgrades and installations within scheduled maintenance periods
- Participates in on-call rotation within engineering staff
- Perform miscellaneous job-related duties as assigned

Position Qualifications Required:

- Bachelor's degree in a computer related field
- 3+ years of increasingly responsible Network Engineer positions
- Certifications Preferred: CCNP, CCNA or equivalent
- Experience with routing protocols (BGP, OSPF)
- Experience with first hop redundancy protocols
- Experience with traffic network traffic management (QoS)
- Experience with segmentation technologies and overlays VPN, VXLAN, VLAN, ACLs on firewalls, routers and switches
- Experience with point to point and point to multipoint vendor circuit technologies
- Experience with Palo Alto firewalls ... a plus
- Experience with cloud infrastructure... a plus
- Ability to communicate effectively with technical and non-technical audiences
- Effective and efficient problem solving skills
- Commitment to 24/7 environment
- Exceptional attention to detail, process and quality

Obsessed with Excellence!

- Ability to manage multiple tasks with shifting priorities is a necessity

Compensation Package:

- Paid Personal Time Off (vacation and sick days)
- Full Family Medical, Dental and Vision coverage
- Insurance: Life, Short-term and Long-term disability
- Individual Performance Bonuses
- Competitive salary
- First class work environment
- Paid Covered Parking
